Pond Snail		2
Hog louse		0
Freshwater shrimp		1
Worm/maggot		1
Stonefly nymph		5
Caddisfly larvae		3
Mayfly nymph (Flat)		2
Mayfly nymph (other)		1

Add up your total score (1 score per type found).

What's your total? .....

*The higher the score, the better quality the water is! The more polluted a river is the less oxygen there is for the more sensitive animals to breathe. This is a way that scientists use to judge how healthy a river is.*

*You can volunteer to do this too, by joining the RiverFly monitoring activity at Forth Rivers Trust.*
